

## Week 8 Challenge Homework:

Build the design:

It should have:

- A button component with a Button.css file
- A text component with two Button components inside it, a p tag and an h tag,  
it should have a CSS file that sets the styles in it
- Use two of those components in your App.js file, and use CSS in App.css to put one of the text components on one side of the page, and the other component on the other.
